

Application Development: Using SCL Lists

Duration: 2.0 days

CEUs: 1.2

AUDIENCE

Developers and Programmers

BENEFITS

This course is designed to teach attendees how SCL lists make up the entire structure and backbone of SAS/AF Software. They are crucial for storing all instance variable information that is used by all methods. This course concentrates on working with lists for all forms of application development.

PREREQUISITES

Application Development I: Using SAS/AF Software or equivalent understanding.

COURSE TOPICS

Introduction to SCL Lists

- *Characteristics*
- *Functions*
- *Uses*

Reference

- *Making Lists*
- *Making Named Lists*
- *Inserting Values into lists*
- *Getting Values from lists*
- *Documenting Lists*
- *Setting Values in Lists*
- *Other List Functions*

Applications Using Lists

- *Passing Values from Frame to Frame*
- *Text Reports*
- *Procedure Menu System*
- *Talking to several objects at once*

Workshop Sessions

- *List of Programs*
- *Create Your Own Program Editor*
- *Extending the Program Editor*
- *Procedure Menu System*
- *Displaying Selected Librefs*

Software Used: SAS/AF®
