

Web Processing: Using webEIS™ Software to Present MDDBs

Duration: 1.0 day

CEUs: 0.6

AUDIENCE

This course is for programmers who need to display multi dimensional data on the web.

BENEFITS

Students will be able to create:

- *Multi dimensional databases*
- *Web documents that display this data*
- *Tables, reports and bar charts*

PREREQUISITES

Executive Information Systems and Multi Dimensional Database Basics with SAS/EIS® and SAS/MDDB® Server Software course or equivalent understanding.

COURSE TOPICS

MDDB Creation

- *What is an MDDB*
- *Creating an MDDB and Registering data*

Creating a webEIS Document

- *What is webEIS*
- *Understanding the interface*
- *Setting up a document*
- *Adding components*
- *Publishing MDDBs in a table and bar charts*

Deploying webEIS Applications

- *Creating the JAR file*
- *Using SAS NETCOPY*
- *Rules of thumb for data size*
- *Using the Java application*

Software Used: Base SAS, SAS/IntrNet®, SAS/MDDB® Server and AppDev Studio Software.
