SQL Query Window for Non-Programmers

Course Length: 1 day   **CEUs** 0.6
Format: Hands on Training

AUDIENCE

This course is designed to show users how to use the Query Window in SAS® software to query data. Extensive demonstration and workshop sessions show users how to get the most from their data in a point and click environment. This course is designed for SAS Software users who want to learn query concepts and relate those concepts to their data in a point and click environment.

BENEFITS

Attendees will understand how they can access their data, no matter where it may live and process on the appropriate environment.

PREREQUISITES

Programming I: SAS Essentials course or equivalent understanding

COURSE TOPICS

SQL Query Window Basics
- Introduction
- Selecting Data
- Other Enhancements

The Query Environment
- Profile Overview
- Saving Queries
- Design Reports From Query Results

File PMENU Option
- The File Pmenu Abilities
- Saving Queries
- Using Existing Queries
