IBM X-Force Incident Response and Intelligence Services

Highlights

- Gain expert insights to help your security team to more effectively defend
- Develop security capabilities
- Effectively detect and prevent attacks

Minimize time, costs and exposure associated with data breaches

Data breaches and other security incidents are a fact of life, and historically incident response runs over budget and takes too long. But proactive management and preparation can improve the efficacy of managing security risk and reduce overall costs. With the right services and processes in place, it is possible to identify potential threats, detect and contain existing threats before they wreak havoc, and respond quickly in worst-case scenarios by coordinating response efforts ahead of time.

- Prevent, detect and respond to security incidents more efficiently and effectively

- Protect your intellectual property, client data, reputation and market share and achieve better control over security incidents and breaches

- Avoid a chaotic response resulting in longer recovery times and inflating recovery costs

- Prepare for and respond to threats and incidents with intelligence, across all endpoints, from mainframes to mobile devices

To address the growing need for stronger, more proactive incident response preparedness, IBM has established the IBM X-Force Incident Response and Intelligence Services (IBM X-Force IRIS) team comprised of industry-leading, highly skilled security professionals, experienced in investigating the world's largest breaches. This enhanced proactive approach is designed to help organizations prepare

for, prevent, detect and respond to security incidents more efficiently and effectively to help minimize the loss of revenue and recovery costs associated with a security incident.

IBM X-Force Intelligence Services

IBM X-Force Intelligence Services is foundational to an organization's security efforts, providing insights that allow your security team to be knowledgeable about threats to your environment. X-Force Intelligence Services capabilities include:

- Threat analysis

- Intelligence enablement training

- Advanced cyber-threat intelligence

IBM X-Force Incident Response and Proactive Services

IBM X-Force Incident Response and Proactive Services helps you prepare for and respond to threats and incidents across all endpoints, from mainframes to mobile devices. Specific capabilities include:

- Incident response

- Forensic analysis

- Threat assessments

- Incident response program development

- Tabletop exercise and scenario testing

- Managed detection and response

- Incident response retainer

IBM X-Force Remediation Services

IBM X-Force Remediation Services helps organizations develop the capabilities to more effectively detect and prevent attacks—and execute responses to attacks. X-Force Remediation Services capabilities include:

- Agile incident management

- Breach remediation

- Strategic remediation and implementation

Why IBM?

The IBM X-Force IRIS team is comprised of highly skilled experts with decades of leading-edge incident management and security intelligence experience, having worked on hundreds of the world's biggest breach investigations in both the public and private sectors. The global team possesses a depth and breadth of cross-competency security knowledge that is unparalleled.
