Experience a breach from a fusion center watch floor

Feel the adrenaline rush of an intense, immersive, gamified experience with your entire cross-functional team.

Respond to real-world cyber-attack scenarios, in a fusion team environment based on a security operation center.

See the consequences of a deficit of incident response planning and practice.

Understand how your solutions work together

Engage with multiple tools to investigate a cyber issue.

Experience the most cutting-edge security technologies and how they are applied to modern investigations.

Understand hacker tools and how attackers compromise victims.

Practice your response with teams working together

Collaborate with your cyber analysts, legal, PR, and executive teams during a mock incident.

Experience a gap analysis while building your cyber strategy and incident response plan.

Get feedback on your technical, communication, and crisis leadership skills.

4 hour experience

8–24 participants
C-suite level and
SOC leaders

Legal, risk, HR,
PR, finance, cyber
and IT

IBM **Security**

OpRedEscape

Experience the dark side as a member of an elite hacking crew, with the goal of stealing data from a victim's network. Learn how attacker tools work when you watch demonstrations, and get hands-on time with a malicious toolkit. The event culminates with an escape room challenge, where players put their new-found skills to use. This challenge can be customized to the appropriate skill level for players.

finance, cyber and IT

Challenges

Cyber Wargame

Test your incident response process by positioning your technical and business teams in the middle of a cyber-security incident. Technical participants are challenged to investigate the incident, gather evidence and report their findings. The leadership team must grapple with business related consequences of the cyber attack.

Focus

Technical ———————————————— Business

Instruction

Self-directed ———————————————— Guided
Technical Team – minimum 6 participants. Participants should be familiar with a SIEM and incident response platform in order to do event/log analysis and record evidence

Business Team – minimum 4 participants. Ideal for participants from legal, human resources, communications, finance, and business area leads

**5 hour experience
10–20 participants**
